

SMD-2.8 - carrier kit version

STEP MOTOR DRIVER

Stepper motor driver SMD-2.8 with DIN clamp is manufactured in an open case. A frameless version of the driver is also supplied.

The driver is compact and lightweight and implemented with small in size open housing. The operation of the stepper motor with SMD-2.8 DIN clamp driver is characterized by low vibration and noise.

The driver is designed for smooth movement of the stepper motor with microstepping up to 1/128, provides excellent dynamics and high motor torque.

Control methods

- Pulse position control STEP/DIR;
- Speed control via analog voltage signal 0..10 VDC or with built-in potentiometer

Technical parameters

Supply voltage	12 - 24 VDC
Max. current per phase	1.3 - 2.8 A
Microstepping	1/1 - 1/128
Control methods	STEP/DIR, analog input
Version	in an open housing with DIN clamp

Dimensions
